Subject Index

Canadian Journal of Soil Science, Volume 84, 2004

Agricultural intensification
  agricultural intensification in the Middle Mountains, Nepal, 323
Agri-Sul
  S applications on British Columbia forage grass, 227
Amides
  detection of heterocyclic N compounds, 291
Ammonium nitrate
  N response of winter wheat, 125
Animal feeding
  labelling of pig excreta with ^{15}N-enriched feed, 43
Arbuscular mycorrhizal fungi
  arbuscular mycorrhizae and N and P cycling, 383
Available N index
  predicting corn N requirements, 103

Bacteria, endophytic
  endophytic bacteria in nonlegumes, 245
Barley
  fertilizer response of barley silage, 133
  S fertilizer response of barley, 513
Bioavailability
  cropping, manure and soil type effects on P export, 295
Biological soil quality
  crop residue decomposition, 403
  crop residue decomposition and soil microorganisms, 411
Boreal
  patterns of water movement during snowmelt, 71

Calcareous soils
  phosphorus movement in calcareous soil, 447
Calibration
  evaluation of soil water sensors, 431
Canola
  fractionnement de l'azote dans le canola, 491
Carbon, dissolved organic
  soil dissolved organic carbon, 151
  methods of P extraction and determination, 469
Carbon, organic, soil
  compost and soil physical and biological properties, 211
Carbon, total
  compactability of forest soils in British Columbia, 219
Cattle
  yield and early season N after manure, 481
Cattle manure
  soil P distribution after manure application, 275
Cement kiln dust
  changes in soil pH from surface application of lime and cement kiln dust, 317
Cesium
  designing field studies in soil sciences, 1
Classification, soil
  visualization of subsurface soil properties, 63
CO_2 emission
  soil dissolved organic carbon, 151
CO_2 evolution
  soil organic matter dynamics in long-term rotations, 49
Coated urea
  N response of winter wheat, 125
Coefficient d'utilisation apparente
  fractionnement de l'azote dans le canola, 491
Colorimetric P
  methods of P extraction and determination, 469
Community-level physiological profile
  endophytic bacteria in nonlegumes, 245
Compaction
  compactability of forest soils in British Columbia, 219
  litter nitrogen dynamics across forest soil disturbances, 159
Compost
  N mineralization and uptake, 11
Compost amendment
  compost and soil physical and biological properties, 211
Composting
  compost effect on soil composition, 439
Copper chelate
  mobility of Cu fertilizers in soils, 283
Copper mobility
  mobility of Cu fertilizers in soils, 283
Copper sulphate
  mobility of Cu fertilizers in soils, 283
Corn
  combined paper sludge and poultry manure in corn, 503
  cover crop controls NO_3 leaching from pre-plant injected manure, 187
  nitrogen application methods in maize, 169
  predicting corn N requirements, 103
Corn, continuous
  nitrate leaching from residual fertilizer N, 477
Crop residue
  crop residue and tillage effects on N availability, 421
  crop residue decomposition and soil microorganisms, 411
Crop residue quality
  crop residue decomposition, 403
Crop rotation
  crop residue decomposition, 403
  crop residue decomposition and soil microorganisms, 411
  endophytic bacteria in nonlegumes, 245
  rotation, tillage and disease, 397
Crop sequence
  crop residue and tillage effects on N availability, 421

Decomposition
  litter nitrogen dynamics across forest soil disturbances, 159
Denitrification
  N_2O emissions in soils of contrasting textures, 339
Disc infiltrometer
  calculating soil hydraulic properties, 265
Dissolved organic carbon
  soil dissolved organic carbon, 151
  methods of P extraction and determination, 469

Eastern Canada
  compost and soil physical and biological properties, 211

Ectomycorrhizosphere soils
soil properties and ectomycorrhizal fungi, 91
Elemental S fertilizer
S applications on British Columbia forage grass, 227
Endophytic bacteria
endophytic bacteria in nonlegumes, 245
Enzyme activities, soil
biochemistry of a soil under mulching, 19
Erosion
cropping, manure and soil type effects on P export, 295
Erosion-preventive crop rotations
crop rotations and water erosion in Lithuania, 177
Extractable phosphorus
extractractable phosphorus in amended soils, 459

Farm manure
compost effect on soil composition, 439
Feeding, animal
labelling of pig excreta with ^{15}N-enriched feed, 43
Feedlot cattle manure
cattle manure application in east-central Saskatchewan, 199
Fertility, soil
agricultural intensification in the Middle Mountains, Nepal, 323
arbuscular mycorrhizae and N and P cycling, 383
Fiber
fertilizer response of barley silage, 133
Forage
changes in soil pH from surface application of lime and cement kiln dust, 317
Forest floor
litter nitrogen dynamics across forest soil disturbances, 159
Forest hydrology
well permeameter test above an impermeable layer, 255
Frozen soil
patterns of water movement during snowmelt, 71

Glomalin
AMF, glomalin and soil aggregation, 355
glomalin and reduced water infiltration through hydrophobicity, 365
Glomalin-related soil protein
AMF, glomalin and soil aggregation, 355
Grain protein
N response of winter wheat, 125
Greenhouse gasses
N_2O emissions in soils of contrasting textures, 339
Ground-truth
measurement of near surface soil moisture, 237
Guelph permeameter
well permeameter test above an impermeable layer, 255
Gypsum
S applications on British Columbia forage grass, 227

Heterocyclic N compounds
detection of heterocyclic N compounds, 291
Hog
N mineralization and uptake, 11
Hordeum vulgare
fertilizer response of barley silage, 133
S fertilizer response of barley, 513
Hydraulic conductivity
calculating soil hydraulic properties, 265
well permeameter test above an impermeable layer, 255
Hydrologic flowpath
patterns of water movement during snowmelt, 71
Hydrophobic
glomalin and reduced water infiltration through hydrophobicity, 365
Hypothesis testing
designing field studies in soil science, 1

Inductively coupled plasm emission
spectroscopy-P methods of P extraction and determination, 469
Impedance probe
measurement of near surface soil moisture, 237
Incubation
extractractable phosphorus in amended soils, 459
phosphorus fractions in amended soil, 83
Infiltration
patterns of water movement during snowmelt, 71
Infiltration rate
calculating soil hydraulic properties, 265

Labile nitrogen
crop residue and tillage effects on N availability, 421
Labile P fraction
soil P distribution after manure application, 275
Landscape location
predicting corn N requirements, 103
Landscape-scale
designing field studies in soil science, 1
Land use
AMF, glomalin and soil aggregation, 355
Leachate
mobility of Cu fertilizers in soils, 283
Lime
changes in soil pH from surface application of lime and cement kiln dust, 317
Lisier de bovin
fractionnement de l'azote dans le canola, 491
Lisier de porc
fractionnement de l'azote dans le canola, 491
Litter bag
litter nitrogen dynamics across forest soil disturbances, 159
Luvisol
patterns of water movement during snowmelt, 71

Maize
nitrogen application methods in maize, 169
Malting barley
S fertilizer response of barley, 513
Manure application rate
methods of P extraction and determination, 469
Manure, cattle
soil P distribution after manure application, 275
Manure, farm
compost effect on soil composition, 439
Manure, feedlot cattle
cattle manure application in east-central Saskatchewan, 199
Manure management
cattle manure application in east-central Saskatchewan, 199

Manure, pig
N mineralization and uptake, 11
Manure, poultry
combined paper sludge and poultry manure in corn, 503
Manure, swine
cover crop controls NO_3 leaching from pre-plant injected manure, 187
labelling of pig excreta with ^{15}N-enriched feed, 43
soil P distribution after manure application, 275
Maximum bulk density
compactability of forest soils in British Columbia, 219
Microbial activity
crop residue decomposition and soil microorganisms, 411
Microbial biomass
crop residue decomposition and soil microorganisms, 411
Microbial biomass C
soil dissolved organic carbon, 151
Microbial community, soil
arbuscular mycorrhizae and N and P cycling, 383
Microbial diversity
crop residue decomposition and soil microorganisms, 411
Microbial functional diversity
endophytic bacteria in nonlegumes, 245
Minimum tillage
rotation, tillage and disease, 397
Modulus of rupture
peatmoss effect on soil properties, 115
Moisture, soil
arbuscular mycorrhizae and soil/plant water relations, 373
measurement of near surface soil moisture, 237
Mulching practice
biochemistry of a soil under mulching, 19
Multi-site analysis
soil organic matter dynamics in long-term rotations, 49
Mycorrhizae
glomalin and reduced water infiltration through hydrophobicity, 365
mycorrhiza and soil quality, 353
Mycorrhizal symbiosis
arbuscular mycorrhizae and soil/plant water relations, 373

Near-infrared absorbance
near-infrared spectroscopy for soil water determination, 333
Near-infrared spectroscopy
near-infrared spectroscopy for soil water determination, 333
Nitrogen
litter nitrogen dynamics across forest soil disturbances, 159
Nitrogen-15
nitrogen application methods in maize, 169
labelling of pig excreta with ^{15}N-enriched feed, 43
Nitrogen application methods
nitrogen application methods in maize, 169
Nitrogen availability
cattle manure application in east-central Saskatchewan, 199
predicting corn N requirements, 103
Nitrogen cycling
arbuscular mycorrhizae and N and P cycling, 383
Nitrogen fertilization
nitrate leaching from residual fertilizer N, 477
Nitrogen fertilizer placement
N response of winter wheat, 125
Nitrogen fertilizer use efficiency
fertilizer response of barley silage, 133
S fertilizer response of barley, 513
Nitrogen mineralization
N mineralization and uptake, 11
Nitrogen timing
N response of winter wheat, 125
Nitrogen uptake
crop residue and tillage effects on N availability, 421
Nitrogen use efficiency
cattle manure application in east-central Saskatchewan, 199
nitrogen application methods in maize, 169
Nitrate leaching
cover crop controls NO_3 leaching from pre-plant injected manure, 187
Nitrate-N leaching
nitrate leaching from residual fertilizer N, 477
Nutrients
resin extraction of four soils, 31
Nutrients, soil
combined paper sludge and poultry manure in corn, 503

N-XANES spectroscopy
detection of heterocyclic N compounds, 291

Organic amendments
extractractable phosphorus in amended soils, 459
phosphorus fractions in amended soil, 83
Organic matter
mobility of Cu fertilizers in soils, 283
predicting corn N requirements, 103

Paper sludge
combined paper sludge and poultry manure in corn, 503
Particulate organic matter
compost and soil physical and biological properties, 211
Pathogens, soil-borne
rotation, tillage and disease, 397
Pattern studies
designing field studies in soil science, 1
Pea
crop residue and tillage effects on N availability, 421
Peat
well permeameter test above an impermeable layer, 255
Peatmoss
peatmoss effect on soil properties, 115
Permafrost
well permeameter test above an impermeable layer, 255
pH
changes in soil pH from surface application of lime and cement kiln dust, 317
Phosphorus
agricultural intensification in the Middle Mountains, Nepal, 323
cropping, manure and soil type effects on P export, 295
extractable phosphorus in amended soils, 459
resin extraction of four soils, 31
Phosphorus, colorimetric
methods of P extraction and determination, 469
Phosphorus cycling
arbuscular mycorrhizae and N and P cycling, 383
Phosphorus diffusion
phosphorus movement in calcareous soil, 447

Phosphorus fractions
phosphorus fractions in amended soil, 83
soil P distribution after manure application, 275
Phosphorus index
cropping, manure and soil type effects on P export, 295
Phosphorus, soluble organic
methods of P extraction and determination, 469
Physical properties, soil
compost and soil physical and biological properties, 211
Pig manure
N mineralization and uptake, 11
Pig slurry
labelling of pig excreta with ^{15}N-enriched feed, 43
Piloderma spp.
soil properties and ectomycorrhizal fungi, 91
Plant S uptake
S applications on British Columbia forage grass, 227
POM-C and N
soil organic matter dynamics in long-term rotations, 49
Potassium
agricultural intensification in the Middle Mountains, Nepal, 323
Potato
rotation, tillage and disease, 397
Potato yield
compost and soil physical and biological properties, 211
Poultry manure
combined paper sludge and poultry manure in corn, 503
Pre-sidedress nitrate test
cover crop controls NO_3 leaching from pre-plant injected manure, 187
Precipitation
phosphorus movement in calcareous soil, 447
Precision farming
combined paper sludge and poultry manure in corn, 503
Proctor test
compactability of forest soils in British Columbia, 219
Profile probe
evaluation of soil water sensors, 431
Protein
fertilizer response of barley silage, 133
S fertilizer response of barley, 513

Rainfall simulation
cropping, manure and soil type effects on P export, 295
Red clover
soil dissolved organic carbon, 151
Remote sensing
measurement of near surface soil moisture, 237
Research design
designing field studies in soil science, 1
Residual N
nitrate leaching from residual fertilizer N, 477
Resin-extractable
resin extraction of four soils, 31
Restoration
AMF, glomalin and soil aggregation, 355
RGB bitmap
visualization of subsurface soil properties, 63
Rhizoctonia solani
rotation, tillage and disease, 397
Rhizosphere
endophytic bacteria in nonlegumes, 245
Runoff
cropping, manure and soil type effects on P export, 295
Ryegrass
N mineralization and uptake, 11

Saturated hydraulic conductivity
peatmoss effect on soil properties, 115
Secale cereale
cover crop controls NO_3 leaching from pre-plant injected manure, 187
Sequential P extraction
phosphorus fractions in amended soil, 83
soil P distribution after manure application, 275
Sidedress
yield and early season N after manure, 481
Single extraction
extractractable phosphorus in amended soils, 459
Site-specific crop management
spatial variability of crop yields, 307
Slurry
yield and early season N after manure, 481
Snowmelt
patterns of water movement during snowmelt, 71
Soil-borne pathogens
rotation, tillage and disease, 397
Soil C and N
soil organic matter dynamics in long-term rotations, 49
Soil classification
visualization of subsurface soil properties, 63
Soil compaction
compactability of forest soils in British Columbia, 219
Soil composition
compost effect on soil composition, 439
Soil enzyme activities
biochemistry of a soil under mulching, 19
Soil fertility
agricultural intensification in the Middle Mountains, Nepal, 323
arbuscular mycorrhizae and N and P cycling, 383
Soil functioning
arbuscular mycorrhizae and N and P cycling, 383
Soil genesis
designing field studies in soil science, 1
Soil hydraulic conductivity
calculating soil hydraulic properties, 265
Soil microbial community
arbuscular mycorrhizae and N and P cycling, 383
Soil moisture
measurement of near surface soil moisture, 237
Soil N tests
predicting corn N requirements, 103
Soil management
soil organic matter dynamics in long-term rotations, 49
Soil moisture characteristic
arbuscular mycorrhizae and soil/plant water relations, 373
Soil nutrients
combined paper sludge and poultry manure in corn, 503
Soil organic carbon
compost and soil physical and biological properties, 211
Soil organic matter
predicting corn N requirements, 103
Soil physical properties
compost and soil physical and biological properties, 211

Soil properties
soil properties and ectomycorrhizal fungi, 91
Soil protein
AMF, glomalin and soil aggregation, 355
Soil quality
biochemistry of a soil under mulching, 19
Soil solution
nitrate leaching from residual fertilizer N, 477
Soil structure
AMF, glomalin and soil aggregation, 355
glomalin and reduced water infiltration through hydrophobicity, 365
Soil test
yield and early season N after manure, 481
Soil test P
methods of P extraction and determination, 469
Soil texture
mobility of Cu fertilizers in soils, 283
Soil water
near-infrared spectroscopy for soil water determination, 333
Soil water content
evaluation of soil water sensors, 431
Soil water content sensor
evaluation of soil water sensors, 431
Solanum tuberosum
rotation, tillage and disease, 397
Soluble organic P
methods of P extraction and determination, 469
Spatial statistics
designing field studies in soil science, 1
Stomatal conductance
arbuscular mycorrhizae and soil/plant water relations, 373
Structure, soil
AMF, glomalin and soil aggregation, 355
glomalin and reduced water infiltration through hydrophobicity, 365
Substrates
endophytic bacteria in nonlegumes, 245
Sulphate salts
phosphorus movement in calcareous soil, 447
Sulphur
resin extraction of four soils, 31
Sulphur fertilizer, elemental
S applications on British Columbia forage grass, 227
Sulphur fertilizer forms
S applications on British Columbia forage grass, 227
Sulphur rates
S applications on British Columbia forage grass, 227
Susceptibility to compaction
compactability of forest soils in British Columbia, 219
Swine
N mineralization and uptake, *11*
yield and early season N after manure, 481
Swine manure
cover crop controls NO_3 leaching from pre-plant injected manure, 187
labelling of pig excreta with ^{15}N-enriched feed, 43
soil P distribution after manure application, 275

Temperate climate
crop rotations and water erosion in Lithuania, 177
Tillage
crop residue and tillage effects on N availability, 421
Tillage, minimum
rotation, tillage and disease, 397
Topography
spatial variability of crop yields, 307
Total carbon
compactability of forest soils in British Columbia, 219
Toxic elements
resin extraction of four soils, 31
Translocation
litter nitrogen dynamics across forest soil disturbances, 159
Transport model
phosphorus movement in calcareous soil, 447

Undulating upland topography
crop rotations and water erosion in Lithuania, 177
Unknown N
detection of heterocyclic N compounds, 291
Urea
N response of winter wheat, 125
phosphorus movement in calcareous soil, 447
soil P distribution after manure application, 275
Urea, coated
N response of winter wheat, 125

Validation
measurement of near surface soil moisture, 237
Varadium
resin extraction of four soils, 31
Variogram
spatial variability of crop yields, 307
Visualization
visualization of subsurface soil properties, 63

Water erosion rates
crop rotations and water erosion in Lithuania, 177
Water-filled pore space
soil dissolved organic carbon, 151
Water infiltration
glomalin and reduced water infiltration through hydrophobicity, 365
Water relations
arbuscular mycorrhizae and soil/plant water relations, 373
Water retention
peatmoss effect on soil properties, 115
Wetland soils
detection of heterocyclic N compounds, 291

Yield
nitrogen application methods in maize, 169

Zea mays
cover crop controls NO_3 leaching from pre-plant injected manure, 187
nitrogen application methods in maize, 169
